5. Forensic Narrative & Technical Findings

• Threat Summary: CRITICAL SECURITY INCIDENT (100.0/100) [Attribution: ANONYMIZED_INFRASTRUCTURE]. Email 'URGENT: Unauthorized Wire Transfer Detected - Verify Identity' sent from 185.220.101.5 (Germany) exhibits severe identity spoofing and malicious payload indicators.

• Key Forensic Evidence: High-Risk Phishing Link Identified (Score: 100.0/100); Failed SPF & DMARC Sender Identity Verification; BEC Domain Spoofing: Reply-To (phisher-drop@external-scam.biz) differs from From (Executive Security Alert <security@paypal-verification.top>); Originating MTA (185.220.101.5) is an Anonymized Proxy / Tor / Hosting Infrastructure (Stiftung Erneuerbare Freiheit); NLP Body Analysis: BEC_FRAUD detected (score 60.0/100); WHOIS: Sender domain has no registration record.

• Recommended Action: QUARANTINE IMMEDIATELY. Block sender domain and originating IP across edge gateways. Purge copies from recipient mailboxes and alert SOC team.

6. Evidence Handling Notes

This report was generated automatically by TrustShield. The SHA-256 above was computed over the bytes of the uploaded message. Whether this record has been sealed or independently verified is stated below exactly as recorded in the dossier. Use of this report as evidence in any proceeding may require a separate certificate from a responsible person under applicable law; this document does not itself constitute such a certificate.
